Hi everyone. I was looking for info on the above radios. What I'm
looking for is descriptions, parts, general feelings on them. I have
someone who wants to sell them to me, and I want to know things as
prices for crystals, PL reeds, mics, etc.

Any information should be sent thru email, as I don't get to the newsgroup
nearly as often.

Thanks in advance.

I made DX contact from my mobile station on 11m and 10m bands over in France.

I want to buy a new transceiver for that, but I'm not sure of the model...

Is there someone can discuss about 2 models of transceiver :

- the UNIDEN 2830 (President LINCOLN in Europe)
- the RANGER RCI-2950 (Dirland RCI 2950 in Europe)

WHAT THE BEST OF THIS TWO MODELS ?

In RX, in TX, in quality of modulation and fabrication ... etc

Thanks for all responses,

Best 73+51 to you aand QRA.

All of them are superb radios.

The Yaesu FT-530 has the *most* "bells and whistles".
That is, it has the most features and can be quite complex
and overwhelming.

The DJ-580 and TH-78 are also excellent radios, but less techie.
However, I personally believe the TH-78 looks the neatest
out of the bunch.

I prefer the Yaesu and Kenwood over the Alinco, due to the fact
that with all Alinco products I've seen(HT concerned), the
dials/knobs are a bit flimsy, and look like they're about to
pop off at any second.

All of them are priced almost the same, around \$400 U.S. dollars,
give or take \$20.
